Speed Hump Policy

To help control and enforce speed limits, the City of Covington has established a policy for the design and installation of speed humps on certain residential streets. For a street in a subdivision to be considered for speed humps, the property owners along this street or a homeowners association must submit a request to the Public Works Department for review and consideration. Minimum criteria for speed humps include:

Investigation:

- The Public Works Director shall be responsible for doing a complete investigation after a request has been made to install speed humps.
- The investigation will start by monitoring speed to collect data and determine if there is a speeding problem.
- Once the data is collected confirming a speeding problem it will be turned over to the Covington Police Department to enforce the speed limit.
- If it is determined by CPD that speed control can't be achieved through enforcement, and it be determined there would be no disruption of emergency response equipment or other essential services, speed humps may be a viable option.

Installation:

- Speed humps can only be located on local roadways in a subdivision or street that connect with major arterial or collector streets per the City of Covington's major road plan.
- The roadway must be a two lane street (less than 30 feet wide and with grades less than 6.0%).
- The posted speed limit is 30 M.P.H. or less with measurable speed problems.
- At least 2/3 of the residents living within 1,000 feet of the proposed humps must support the installation through means of a written petition.
- Due to the cost of the speed humps, they must remain in place for a minimum of three years once placed.
- The Public Works Committee must review and approve said request, and then it will go to Board for final approval.
- Generally, speed humps should be installed in multiples of 3-5 to be effective in controlling speed.

If you have any questions about the program, please contact the Public Works Director at 476-9531 ext. 127.

Speed Hump Petition

Public Works Department

Dear Resident:

By signing this petition you will indicate that you have reviewed the Speed Hump Policy.

Also, by signing in the appropriate box below, you will give your approval or disapproval. If you are not shown the policy please Do Not Sign, and call David Gray, Director of the City of Covington Public Works Department at (901) 476-9531 ext.127.
